

# Finding ways to improve your herd through reproduction.

In this short, evening course, we will help you discover ways to improve your herd through various reproductive strategies.

Those that are interested in artificial insemination (AI) can practice their technique with a hands-on demonstration following the lecture.

River View Veterinary Service

215 N Main Street, Port Byron, IL 61275

## AI and Breeding School

---

A short course on reproductive strategies in cattle

**April 19, 2017**  
**Cordova Civic Center**  
**6:00 – 8:00 pm**

## Education

At the River View Veterinary Service, we are committed to quality, practical education, both for the staff and for our clients. That's why we offer our AI School every spring, prior to most breeding seasons.

### AI School

At our Artificial Insemination (AI) School, we focus on more than just AI. We discuss a variety of synchronization protocols and the benefits and drawbacks of each. We work with individuals in attendance to find the best protocol for their herd.

Artificial insemination is also discussed. There is a hands-on opportunity for attendees to practice their technique. Multiple reproductive tracts will be available.

A brief discussion of breeding soundness exams on bulls will also be discussed.

## What is the benefit?

Learn about the different reproductive strategies in a relaxed environment where questions are welcomed! More experienced producers can share their knowledge with others, while gaining the newest information and polishing old skills.

Whether you have one cow or a herd of thousands, all will benefit from attending. Let's get planning for a better herd!

### Just bring yourself and your questions!

We know how difficult it can be to get the chores done and get anywhere on time. We will do our best to help! We will provide the information, the supplies for the lab portion, and dinner. All you need to provide is your questions.

## RSVP by April 12

Please send us your RSVP to [rvvscustomerservice@gmail.com](mailto:rvvscustomerservice@gmail.com) or call us at **309.848.9093** by April 12 to reserve your spot!

### Dinner is served!

A full dinner will be served starting at 6:00 pm. A brief presentation with a question and answer session will take place during dinner with the hands-on lab portion to follow.
